

Company Profile

Vision

“ We believe that using fully-integrated business process instead of traditional and manual approaches can improve an enterprise's ability to strategically leverage its resources and maximize the value of its investments.”

Mission

Provide high quality professional services over full standardized process lifecycle. We deliver enterprise application and full business solutions based on commitments with our customers which we consider them our partners in success.

Methodology

ITSpark has carefully evolved a successful and powerful project methodology to ensure delivery of projects on-time, on-budget, and to customer satisfaction. Our methodology is the culmination of rich experiences coupled with industry 'best practices' and it defines the adopted management controls and processes that ensure project execution matches customer expectations.

Services

We provide onshore and offshore (out sourcing) professional services based on standardized process lifecycle.

Application Development Outsourcing

ITSpark provides individual developers on demand as well as dedicated development teams to augment your in-house team or cover specific technical needs and domain expertise.

Web Application and Portals

Our dedicated web application developers have successfully completed many projects for a variety of industries and business domains, including e-Commerce, e-Learning, Analytics, Finance, Entertainment and more.

Mobile Application

Picking the right approach to mobile application development is a critical success factor that can make or break your project. ITSpark's mobile application developers typically use an agile, low-risk mobile development methodology that has a proven success record and ensures rapid results and 100% visibility.

Digital Marketing

Our experienced team of digital marketing experts will customize, refine and manage your online advertising campaigns to ensure you get the most return for your investment.

Values

Innovation

We are convinced that innovation is the key to business excellence. We are highly regarded as a creative problem-solver able to think laterally, that is, 'outside the box'. We are able to apply this creative force to everything we do, including designing a solution to your business problem, finding a new way to structure a team, or looking for a better way to deliver a project.

Integrity

We take pride in our work and it shows. Right within ourselves, in the way we conduct business, interact with customers, work with our partners, and develop software, we carry a strong work ethic and a conviction that things have to be done the right way.

Quality

Quality is at the center of everything we do. We set the highest quality standards for ourselves, and continuously measure how we stack up against these goals. In order to align our processes with our values, we create the business processes required to ensure quality is built into the core of our services. We are committed to deliver high quality solutions by following the latest quality assurance techniques, improving productivity and delivering the solution on-time.

Values

Agility

With our love of change, we are continuously adjusting to the new challenges we face every day. May it be re-structuring to better meet our customer needs, embracing new technologies, or re-engineering our business processes, we are convinced that there is always a better way, and we are constantly looking for it. We don't fear change; we embrace it

Team-play

We take our work very seriously. We care for and greatly respect every individual on the team, whether on an internal project or as part of a larger customer project. When difficulties mount and our backs are against the proverbial wall, we have the courage to do things right and to do the right thing – even if this means long days, lost weekends, or a complete re-design.
